SUBJECT INDEX

Aflatoxin
- method to rapidly recover from food, 119
- produced in luncheon meat and cheese, 349

Bacillus cereus
- affected by immunoglobulins, 345
- in dry foods, 12

Bacteria
- affected by pesticides, 16
- as causes of oviposition by cheese skipper, 410
- association among lactics, 236
- **Bacillus cereus** in dry foods, 12
- changes in shrimp caused by, 115, 533
- coliforms, survival in cultured dairy products, 54
- germination of **Clostridium perfringens** spores, 378
- growth
  - in heated skimmilk, 204
  - of lactics in soymilk, 30, 63, 69, 124
  - of **Leuconostoc citrovorum** in fortified skimmilk, 357
  - on stainless steel surfaces, 569
- in
  - cocoa beans, 369
  - dry-cured ham, 586
  - manufacturing grade raw milk, 249
  - pasteurized milk, 145, 244
  - poultry products, 23
  - raw fruits and vegetables, 184
  - salads and sandwiches, 289
  - soft-serve frozen dessert mix, 256
  - stabilized aerospace food waste, 478
- injured, recovery of, 548
- spores destroyed by hot chemicals, 365
  - standards for catered foods, 227

Bacteriological methods
- acidulants in media for yeast and mold counts, 475
- automated, 516
- broth to separate lactic streptococci, 43
- medium to detect **Clostridium botulinum** type E, 492
- medium and procedure to recover salmonellae from dairy product, 6
- milk, testing, raw and pasteurized, 172, 173, 260, 264, 279, 613
- quality control in, 361
- recovery of **Bacillus cereus** from foods, 12
- sterility of heated foods, test for, 196
- use to evaluate milk production conditions, 200

Beta-galactosidase
- characterization of, 300
- use in milk and milk products, 294

Book review
- **Bovine Mastitis**, 552
- **By-products from Milk**, 371
- **Disinfection**, 328
- **Ultra-High Temperature Processing of Dairy Products**, 368

Butter, continuous making, composition control, 529

Buttermilk, survival of coliforms in, 54

Carcinogens, food additives with low potential as, 394

Cereals
- production patterns, 85
- (see soymilk)

Cheese
- cottage, survival of coliforms in, 54
- industry, 50 years of progress, 329
- mechanized manufacturing, 514
- method to recover salmonellae from, 6
- staphylococci in, 583

Chemical methods
- automated, 516
- cheese quality control, 329
- composition control in continuous buttermaking, 529
- for stabilization of aerospace food waste, 478
- gel filtratin and ion exchange chrometography to separate whey fractions, 241
- lead poisoning detection, 593
- proteolysis in soymilk, measurement of, 124
- rapid recovery of aflatoxin from foods, 119

Cherries, sour, sanitation and water usage in processing of, 428

Chocolate milk, (see milk, chocolate)

Clostridium botulinum, medium to detect type E, 492

Clostridium perfringens
- enterotoxin, 596
- growth in meat loaf, 215
- in salads and sandwiches, 289
- poisoning outbreak, 576
- spores, germination of, 378

Cocoa beans, microflora of, 369

Coliforms
- growth in heated skimmilk, 204
- in fruits and vegetables, 184
- in salads and sandwiches, 289
- survival in cultured dairy products, 54

Confectionery industry, quality control in, 514

Consumer protection, in Los Angeles County, 516

Dairy herds, proper management, 514

Dating of milk, differences between markets, 46

Dry milk, (see milk, dried)

Eggs
- pasteurized, direct microscopic count of, 209
- pasteurizers, temperature in holding tubes, 431
- pasteurization, continuous, 516

Environment
- chemical carcinogens, 394
- fecal contamination, 184
- glass containers in, 91
- laboratories, need for, 526
- lead poisoning, test for, 593
- manure handling in dairy housing, 129
- metal and plastic packaging in, 232
- Mission 5000, 517
- of food processing equipment, 569
- plastic packages, 485
- response to challenge, 37
- rodents in, 471

Enzyme
- in cheesemaking, 329
- (see Beta-galactosidase)

E-3-A Sanitary standards
- air under pressure, 155
- instrument fittings and connections, 415
- pasteurizers, batch non-coil type, 541
- pipelines and cleaning systems, 160
- pumps, 171
- rubber and rubber-like materials, 153
- thermometer fittings and connections, 422
- valves, plug, 312

Equipment
- food processing, microbial growth on surfaces, 569
- (see E-3-A Sanitary standards, 3-A Sanitary Standards)

Fermentation
- indigenous substrates and world food problem, 2
- lactic
  - affected by pesticides, 16
  - affected by sorbate, 307
  - in soymilk, 30, 63, 69, 124
  - sauerkraut, 521

Fish
- better utilization of, 515
- destruction of salmonellae in, 467

Food
- additive petition process, 142
- additives with low carcinogenic potential, 394
- **Bacillus cereus** in, 12
- catered, production problems and standards, 227
- emulsions, surface tension of, 584
- fermented and world problem, 2
- freeze dried, 513
- heated, test for sterility of, 196
- industry, sanitation in, 372
- perishable and potentially hazardous defined, 377
- personnel sanitation in processing, 553
- processing equipment, microbial growth on surfaces, 569
- production and processing patterns, 85

Food-borne illness
- time-temperature studies in detecting, 576
- (see Aflatoxin, **Bacillus cereus**, **Clostridium botulinum**, **Clostridium perfringens**, **Salmonellae**, **Staphylococci**, **Vibrio parahaemolyticus**)

Fruit
- cherries, sour, processing of, 428
- fecal contamination of, 184
- production patterns, 85

cultures as affected by sorbate, 307
survival of coliforms in, 54

CONTENTS, VOLUME 34

JANUARY (NO. 1)

Notice to Authors and Readers. An Expanded Journal and an Enlarged Editorial Board ---------- 1
Technology and the World Food Problem: Challenges With Indigenous Fermented Foods. *E. H. Marth* -- 2
A Selective Medium and Presumptive Procedure for Detection of *Salmonella* in Dairy Products. *R. E. Hargrove, F. E. McDonough, and R. H. Reamer* ------ 6
Occurrence of *Bacillus cereus* in Selected Dry Food Products. *H. U. Kim and J. M. Goepfert* ---------- 12
Effect of Malathion and Trichlorfon on Growth and Morphology of Lactic Culture Organisms. *D. D. Deane and M. M. Van Patten* ---------- 16
Microbiology of Poultry Products. *A. A. Kraft* -------- 23
Growth and Activity of Lactic-Acid Bacteria in Soymilk. I. Growth and Acid Production. *Antonieta Gaddi Angeles and E. H. Marth* ---------- 30
A Response to the Environmental Challenge. *Norman Myrick* ---------- 37
Report of the Executive Secretary and Managing Editor, 1969-1970 ---------- 42
A Differential Broth for Separating the Lactic Streptococci. *M. S. Reddy, E. R. Vedamuthu,* and *G. W. Reinbold* ---------- 43
Report of the Committee on Food Protection, 1969-1970 -- 45
Quality and Economic Considerations in the Dating of Milk. IV. Milk Handling Practices in Stores. Differences Between Dating and Non-Dating Markets. *E. D. Glass, Jr., G. H. Watrous, Jr., W. T. Butz, W. F. Johnstone, and C. W. Pierce* ---------- 46
Report of the Committee on Frozen Food Sanitation, 1969-1970 ---------- 53
Fate of Coliforms in Yogurt, Buttermilk, Sour Cream, and Cottage Cheese During Refrigerated Storage. *M. C. Goel, D. C. Kulshrestha, E. H., Marth, D. W. Francis, J. G. Bradshaw, and R. B. Read, Jr.* ------ 54
Association Affairs ---------- 58
Report of the Editor, *Journal of Milk and Food Technology*, 1969-1970 ---------- 58

FEBRUARY (NO. 2)

Growth and Activity of Lactic-Acid Bacteria in Soymilk. II. Heat Treatment of Soymilk and Culture Activity. *Antonieta Gaddi Angeles and E. H. Marth* -------- 63
Growth and Activity of Lactic Acid Bacteria in Soymilk. III. Lipolytic Activity. *Antonieta Gaddi Angeles and E. H. Marth* ---------- 69
A Research Note. Composition of Raw and Processed Skimmilk. *B. J. Demott* ---------- 74
A Research Note. The Direct Microscopic Somatic Cell Count as a Screening Test for Control of Abnormal Milk. *W. D. Schultze, J. W. Smith, D. E. Jasper, O. Klastrup, F. H. S. Newbould, D. S. Postle, and W. W. Ullmann* ---------- 76
The Effect of a Phosphate Buffer and Magnesium Carbonate on Quality Attributes of Cooked Green Vegetables. *F. M. Clydesdale, A. W. Goodman, and F. J. Francis* ---------- 78
Report of the Baking Industry Equipment Committee, 1969-1970 ---------- 81
Factors Affecting the Viscometric Method for Estimating the Somatic Cell Count of Cow's Milk. *L. R. Fell, W. G. Whittlestone, and H. DeLangen* ---------- 82
Changing Patterns in Food Production and Processing. *Harold E. Calbert* ---------- 85
Solid Waste Disposal as a National Problem. *John H. Abrahams, Jr.* ---------- 91
What Can We Learn About Sanitation From Other Countries? *C. K. Johns* ---------- 97
3-A Sanitary Standards for Flow Meters for Milk and Liquid Milk Products ----------102
Association Affairs ----------105
Report of the Committee on Dairy Farm Methods, 1969-1970 ----------105
News and Events ----------111

MARCH (NO. 3)

Comparison of Extract-Release Volume, pH, and Agar Plate Count of Shrimp. *C. Vanderzant and R. Nickelson* ----------115
A Procedure for Rapid Recovery of Aflatoxins from Cheese and Other Foods. *C. N. Shih and E. H. Marth* ------119
Growth and Activity of Lactic-Acid Bacteria in Soymilk. IV. Proteolytic Activity. *Antonieta Gaddi Angeles and E. H. Marth* ----------124
Manure Handling Systems and Environmental Control for Confined Dairy Housing. *D. W. Bates* ----------129
Foam Temperatures During Vat Pasteurization of Milk Products. *R. W. Dickerson, Jr. and R. B. Read, Jr.* --133
Amendment to Sanitary Standards for Thermometer Fittings and Connectors Used on Milk and Milk Products Equipment ----------139
A Research Note. Relationships Between Weather Factors, Source of Sample, Composition of Milk, and Freezing Point Depression. *B. J. Demott* ----------140
Report of the Committee on Applied Laboratory Methods, 1968-1970 ----------141
The Food Additive Petition Process. *John H. Nelson* ----142
A Survey of the Actual and Potential Bacterial Keeping Quality of Pasteurized Milk From 50 Pennsylvania Dairy Plants. *G. H. Watrous, Jr., S. E. Barnard, and W. W. Coleman II* ----------145
Holders of 3-A Symbol Council Authorizations on Feb-

XUM

ruary 20, 1971 ----------150
E-3-A Sanitary Standards for Multiple-Use Rubber and Rubber-Like Materials Used as Product Contact Surfaces in Egg Processing Equipment ----------153
E-3-A Accepted Practices for Supplying Air Under Pressure in Contact With Liquid Egg and Egg Products and Product Contact Surfaces ----------155
E-3-A Accepted Practices for Permanently Installed Sanitary Product-Pipelines and Cleaning Systems ------160
Association Affairs ----------164

APRIL (NO. 4)

Instructions to Contributors, *Journal of Milk and Food Technology* ----------169
Amendment to E-3-A Sanitary Standards for Pumps for Liquid Egg Products ----------171
Bacteriological Testing of Milk for Regulatory Purposes—Usefulness of Current Procedures and Recommendations for Change. I. The Problem. *R. B. Read, Jr.* --172
Bacteriological Testing of Milk for Regulatory Purposes—Usefulness of Current Procedures and Recommendations for Change. II. Bacteriological Testing of Raw Milk for Regulatory Purposes. *C. K. Johns* ------173
Supplement No. 1 to the 3-A Sanitary Standards for Fittings Used on Milk and Milk Products Equipment and Used on Sanitary Lines Conducting Milk and Milk Products, Revised ----------180
Amendment to the 3-A Sanitary Standards for Farm Milk Cooling and Holding Tanks, Revised --------183
Fecal Contamination of Fruits and Vegetables. A Review. *Edwin E. Geldreich and Robert H. Bordner* --184
A Research Note. Simple Test to Predict Commercial Sterility of Heated Food Products. *Richard C. Hall* --196
Supplement No. 2 to the 3-A Sanitary Standards for Instrument Fittings and Connections Used on Milk and Milk Products Equipment ----------197
Evaluation of Production Conditions of Manufacturing—Grade Raw Milk by Fieldmen Ratings and by Bacterial Tests. *Roger Dabbah, W. A. Moats, and J. C. Olson, Jr.* ----------200
Influence of Heat Treatment of Skimmilk Upon Growth of Enteropathogenic and Lactic Bacteria. *V. K. Singh and E. M. Mikolajcik* ----------204
Effect of Pasteurization on the Direct Microscopic Count of Eggs. *H. E. Hall, D. F. Brown, and R. B. Read, Jr.* ----------209
Amendment to 3-A Sanitary Standards for Pumps for Milk and Milk Products, Revised ----------211
The Freezing Point of Herd Milk Produced in Kentucky. *T. R. Freeman, J. L. Bucy, and D. D. Kratzer* -----212
A Research Note. Growth of *Clostridium perfringens* in Meat Loaf With and Without Added Soybean Protein. *D. J. Schroder and F. F. Busta* ----------215
Publications Recommended by the Dairy Farm Methods Committee ----------217
Affiliates of IAMFES ----------219
Association Affairs ----------221
News and Events ----------222

MAY (NO. 5)

Catered Convenience Foods—Production and Distribution Problems and Microbiological Standards. *Robert Angelotti* ----------227
Metals and Plastics in Packaging and the Environment. *Elmer W. Griese* ----------232
Associative Growth Relationships in Two Strain Mixtures of *Streptococcus lactis* and *Streptococcus cremoris*. *M. S. Reddy, E. R. Vedamuthu, C. J. Washam, and G. W. Reinbold* ----------236
Use of Gel Filtration and Ion Exchange Chromatography for Partial Fractionation of a Solution From Whey Containing Sodium Chloride, Ash and Lactose. *M. A. Khorshid, I. D. Rifaat, M. H. Abd El-Salam, and and A. A. Hofi* ----------241
An Assessment of the Flavor Quality of Whole Milk Available at Commercial Outlets. *Lester Hankin, Walter F. Dillman, and Elmer Olin Anderson* ----------244
Manufacturing Milk Quality: A Re-evaluation. *W. S. LaGrange* ----------249
Effect of Pasteurization Conditions, Type of Bacteria, and Storage Temperature on the Keeping Quality of UHT-Processed Soft-Serve Frozen Dessert Mixes. *J. H. Martin and P. W. Blackwood* ----------256
Report of the Committee on Sanitary Procedures, 1969-1970 ----------259
Bacteriological Testing of Milk for Regulatory Purposes—Usefulness of Current Procedures and Recommendations for Change. III. Raw Milk Quality—Where Do We Go From Here? *George W. Reinbold* --------260
Bacteriological Testing of Milk for Regulatory Purposes—Usefulness of Current Procedures and Recommendations for Change. IV. Quality at the Point of Consumption. *R. B. Maxcy* ----------264
Program, 58th Annual Meeting of IAMFES ----------268
Association Affairs ----------273
News and Events ----------277

JUNE (NO. 6)

Bacteriological Testing of Milk for Regulatory Puruposes—Usefulness of Current Procedures and Recommendations for Change. V. Pasteurized Milk. *H. C. Olson* -279
Bacterial Concentrations in Raw Milk Immediately After Laboratory Pasteurization And Following 10 Days Storage at 7.2 C. *G. H. Watrous, Jr., S. E. Barnard, and W. W. Coleman II* ----------282
Collaborative Study of Confirmatory Testing Procedures for Somatic Cells in Milk, *R. B. Read, Jr., J. G. Bradshaw, and J. T. Peeler* ----------285
Report of the Committee on Food Equipment Sanitary Standards, 1969-1970 ----------288
The Microbial Content of Some Salads and Sandwiches at Retail Outlets. *L. N. Christiansen and N. S. King* --289
Use of Yeast Beta-Galactosidase in Milk and Milk Products. *W. L. Wendorff, C. H. Amundson, N. F. Olson, and J. C. Garver* ----------294
Characterization of Beta-Galactosidase from *Saccharomyces fragilis*. *W. L. Wendorff and C. H. Amundson* ----300
Effect of Potassium Sorbate on Yogurt Cultures. *I. Y. Hamdan, D. D. Deane, and J. E. Kunsman, Jr.* ------307
E-3-A Sanitary Standards for Inlet and Outlet Leak Protector Plug Valves for Batch Pasteurizers ----------312
3-A Sanitary Standards for Homogenizers and Pumps of the Plunger Type ----------323
Association Affairs ----------326
Book Review. *E. H. Marth* ----------328

JULY (NO. 7)

Fifty Years of Progress in the Cheese Industry. A Review. *Walter V. Price* ----------329
A Research Note. The Effect of Retort Cooking Pressure and Breading Technique on Yield and Percent Breading of Broiler Parts. *R. C. Wyche and T. L. Good-*

win ---347
Production of Aflatoxin in Pre-Packaged Luncheon Meat and Cheese at Refrigerator Temperatures. *L. S. Oldham, F. W. Oehme, and D. C. Kelley* ---349
A Research Note. Flavor Characteristics of Normal and Abnormal Milk. *J. J. Janzen* ---352
Erratum. An Assessment of the Flavor Quality of Whole Milk Available at Commercial Outlets. *Lester Hankin, Walter F. Dillman, and Elmer Olin Anderson* ---353
Inosine Monophosphate (IMP) and Hypoxanthine Formation in Three Species of Shrimp Held on Ice. *Frederick E. Stone* ---354
Growth Characteristics of *Leuconostoc citrovorum* in Skimmilk Fortified With Liver Concentrate or Pancreas Extract. *M. C. Goel and E. H. Marth* ---357
Quality Control in Dairy Microbiology. *Harriette D. Vera* ---361
Spore Destruction With Hot Chemical Solutions. *M. K. Keogh and T. I. Hedrick* ---365
Book Review. *Daryl B. Lund* ---368
Microflora of Cocoa Beans Before and After Roasting at 150 C. *J. C. Barrile, K. Ostovar, and P. G. Keeney* ---369
Book Review. *Gary H. Richardson* ---371
Sanitation in the Food Industry. *D. I. Murdock* ---372
Letter to Editor. *Abraham E. Abrahamson* ---377
Germination of Spores of *Clostridium perfringens*. *Maqsud Ahmed and H. W. Walker* ---378
Milk Flavor: The True Test of Quality. *D. K. Bandler* ---385
News and Events ---387

AUGUST (NO. 8)

Isolation of Salmonellae From Naturally Contaminated Dried Milk Products. I. Influence of Sampling Procedure on the Isolation of Salmonellae. *Bibek Ray, J. J. Jezeski, and F. F. Busta* ---389
Guidelines for Production of Food Additives and Other Chemical Commodities With Least Carcinogenic Potential: A Biochemical Approach. *Gerald M. Lower, Jr. and George T. Bryan* ---394
Microorganisms as Inducers of Oviposition for the Cheese Skipper, *Piophila casei* (L) Diptera. *Billy Ray Jones, Paul P. Graham, and R. F. Kelly* ---410
Supplement No. 1 to the E-3-A Sanitary Standards for Instrument Fittings and Connections Used on Liquid Egg Products Equipment ---415
Supplement No. 2, 3-A Sanitary Standards for Fittings Used on Milk and Milk Products Equipment and Used on Sanitary Lines Conducting Milk and Milk Products, Revised ---418
Amendment to E-3-A Sanitary Standards for Thermometer Fittings and Connections Used on Egg Products Equipment ---422
News and Events ---422

SEPTEMBER (NO. 7)

Isolation of Salmonellae From Naturally Contaminated Dried Milk Products. II. Influence of Storage Time on the Isolation of Salmonellae. *Bibek Ray, J. J. Jezeski, and F. F. Busta* ---423
Sanitation and Water Usage in the Processing of Sour Cherries. *Y. D. Hang, D. L. Downing, and D. F. Splittstoesser* ---428
Temperature Profiles in Holding Tubes of Milk and Egg Pasteurizers. *R. W. Dickerson, Jr. and R. B. Read, Jr.* ---431
Immunoglobulins in Skimmilk and Model Systems and Their Effect on *Bacillus cereus*. *E. M. Mikolajcik and A. K. Choudhery* ---435
Testing Milk for Cleanliness of Production. *Michael H. Roman* ---438
Microwave Ovens and Their Public Health Significance. *Robert L. Elder and Walter E. Gundaker* ---444
Vibrio parahaemolyticus—A Review. *R. Nickelson and C. Vanderzant* ---447
Amendment to 3-A Sanitary Standards for Multiple-Use Plastic Materials Used as Product Contact Surfaces for Dairy Equipment ---452
Performance in Microscopic Counting of Somatic Cells in Milk. I. Effects of Procedural Variations on Accuracy and Precision. *W. D. Schultze, J. W. Smith, D. E. Jasper, O. Klastrup. F. H. S. Newbould, D. S. Postle, and W. W. Ullmann* ---453
Amendment to the 3-A Accepted Practices for the Sanitary Construction, Installation, Testing, and Operation of High-Temperature Short-Time Pasteurizers, Revised ---457
Holders of 3-A Symbol Council Authorizations on August 20, 1971 ---458
The National Conference on Interstate Milk Shipments: Twenty Years in Retrospect. *J. C. McCaffrey* ---461
Association Affairs ---465
News and Events ---466

OCTOBER (NO. 10)

Destruction of Salmonellae by Microwave Heating of Fish With Implications for Fish Products. *Ruth E. Baldwin, M. L. Fields, William C. Poon, and Bernice Korschgen* ---467
A Research Note. The Effect of Mixing on Distribution of Somatic Cells in Bulk Tank Milk. *Gilbert E. Ward and David T. Berman* ---470
The Problems of Rodents in Our Modern Environment. *L. A. Penn* ---471
Fungi in Foods. II. Some Observations on Acidulants Used to Adjust Media pH for Yeast and Mold Counts. *John A. Koburger* ---475
The Relative Effectiveness of 8-Hydroxyquinoline Sulfate and Alkyl Dimethyl Benzyl Ammonium Chloride in the Stabilization of Aerospace Food Waste. *C. T. Bourland, C. S. Huber, and N. D. Heidelbaugh* ---478
Comparison of Methods for Estimating Somatic Cells in Milk. *Gilbert E. Ward and David T. Berman* ---482
Plastic Packages and the Environment. *L. M. Thomka* ---485
Letter to the Editor. Bailus Walker ---491
An Improved Medium for Detection of *Clostridium botulinum* Type E. *T. Lilly, Jr., S. M. Harmon, D. A. Kautter, H. M. Solomon, and R. K. Lynt, Jr.* ---492
3-A Sanitary Standards for Storage Tanks for Milk and Milk Products ---498
Fifty-Eighth Annual Meeting of IAMFES ---503
Brown, Hickey, and Johnson Receive Awards at 58th Annual Meeting of IAMFES ---508
Presidential Address. *Dick B. Whitehead* ---511
Abstracts of Papers Presented at the Fifty-Eighth Annual Meeting of IAMFES ---513

NOVEMBER (NO. 11)

Relationships Between Leukocyte Counts in Bulk Milk and Apparent Quarter Infections in Dairy Herds. *D. S. Postle, R. P. Natzke, and R. W. Everett* ---517
Growth Rates and Fermentation Patterns of Lactic Acid Bacteria Associated With the Sauerkraut Fermentation. *J. R. Stamer, B. O. Stoyla, and B. A. Dunckel* ---521
The Need for Environmental Laboratories. *Patrick Kneaf-*

XUM

sey ---526
An Evaluation of the Kohman Procedure as Applied to Composition Control in Continuous Buttermaking. *Vernal S. Packard, Jr.* ---529
Biochemical Changes in Shrimp Inoculated With *Pseudomonas, Bacillus,* and a Coryneform Bacterium. *B. F. Cobb III, and C. Vanderzant* ---533
E-3-A Sanitary Standards for Non-Coil Type Batch Pasturizers ---541
Symposium on the Restoration of Sublethally Impaired Bacterial Cells in Foods. *B. C. Hobbs, J. C. Olson, Jr., M. L. Speck, R. A. Cowman, Z. John Ordal, F. Eugene Nelson, and Anthony J. Sinskey* ---548
Book Review, *Donald S. Postle* ---552
Personnel Sanitation Problems in Non-Sterile Food Processing. *J. Orvin Mundt* ---553
Staphylococcus aureus and Staphylococcal Food Intoxications. A Review. I. The Staphylococci: Characteristics, Isolation, and Behavior in Artificial Media. *T. E. Minor and E. H. Marth* ---557
Association Affairs ---564
Letter to the Editor. *A. K. Saunders* ---566
News and Events ---567

DECEMBER (NO. 12)

Factors in the Ecosystem of Food Processing Equipment Contributing to Outgrowth of Microorganisms on Stainless Steel Surfaces. *R. B. Maxcy* ---569
A Research Note. The Effects of Storage Temperatures on the Keeping Quality of Half and Half. *Arnold C. Smith* ---574
Use of Time-Temperature Evaluations in Detecting the Responsible Vehicle and Contributing Factors of Foodborne Disease Outbreaks. *Frank L. Bryan, Thomas W. McKinley, and Byron Mixon* ---576
A Research Note. A Case Study: Effect of Mold on Growth of Coagulase–Positive Staphylococci in Cheddar Cheese. *C. L. Duitschaever and D. M. Irvine* --583
A Research Note. Surface Tension of Common Aqueous and Organic Phases in Food Emulsions. *M. K. Supran, J. C. Acton, A. J. Howell, and R. L. Saffle* ---584
Bacterial Flora of Prefrozen Dry-Cured Ham at Three Processing Time Periods and Its Relationship to Quality. *P. P. Graham and T. N. Blumer* ---586
A New Test to Detect Lead Poisoning in Children–A Serious Environmental Problem in the Inner City. *Lester Hankin* ---593
Clostridium perfringens Enterotoxin. *A. H. W. Hauschild* -596
3-A Sanitary Standards for Stainless Steel Automotive Milk and Milk Products Transportation Tanks for Bulk Delivery and/or Farm Pick-Up Service ---600
3-A Accepted Practices for Milk and Milk Product Spray Drying Systems ---607
Bacteriological Testing of Raw Milk and Dairy Products. *George W. Reinbold* ---613
Index to Volume 34, *Journal of Milk and Food Technology* ---619

CLASSIFIED ADS

FOR SALE

Single Service milk sample tubes. For further information and a catalogue please write, Dairy Technology Inc., P. O. Box 101, Eugene, Oregon 97401.

LIQUID SUD'N

rinses freely without film or residue even in COLD WATER. TRY SUD'N.

TODAY it's free rinsing SUD'N for brush and ultra-sonic washing of all laboratory glassware, missile space components . . . used wherever the ultimate in cleaning is essential . . . where anything less would be too expensive.

- Phosphate Free
- Biodegradable
- Non Polluting

MONARCH QUALITY PRODUCTS

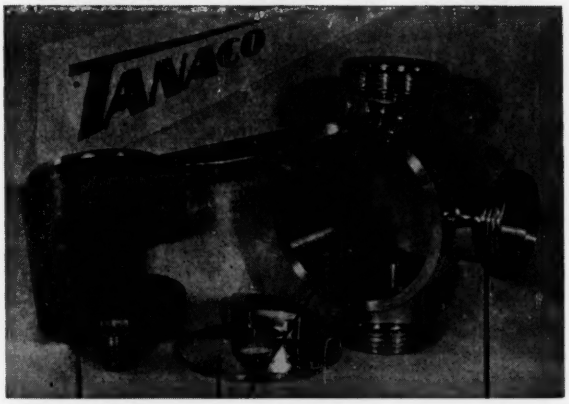
Minneapolis, Minn. 55421

ACHIEVE BETTER SANITATION by MODERNIZING PLUG VALVES with
TANACO PLASTIC PLUGS



SOLID TANACO PLASTIC PLUG smooth non-porous surfaces

Body and fittings deburred and polished. Interior body precision ground and mated to TANACO PLASTIC PLUG

Threads chased. Bevel seat faced. Ports reamed and polished.

Guaranteed Seal!
Cleared by FDA, USDA and USPHS
